

# ReaClassical

Open Source Classical Music Editing Tools

**v24.3**

(Tested on REAPER v7.09)

Release Notes

Changelog since v24.2: <https://github.com/chmaha/ReaClassical/compare/24.2...main>

## Instructions for a new install:

1. Run the latest portable install as per the installation guide (it will create a new ReaClassical folder with a short year + quarter suffix e.g. "ReaClassical\_24"). Run the REAPER binary inside the folder!
2. Sync ReaPack to get the latest version of the ReaClassical functions.

## Instructions to update from ReaClassical 24.0+:

1. Sync ReaPack to get the latest version of the ReaClassical functions.
2. Run the REAPER Update Utility (Ctrl+U) to upgrade to the latest tested version of REAPER noted above.
3. Add new key shortcuts for the move/zoom to S-D marker functions via the actions menu (? shortcut). The default is Ctrl+1,2,3,4 for moving and Alt+1,2,3,4 for zooming. Add new key shortcut for 3-point insert function (F3 is the default). Set "Toolbar: Open/close toolbar 1" to F6 shortcut. See figure 1.
4. Retrieve the new ReaClassical.ReaperMenu file from a new portable install (under MenuSets folder).

Filter ReaClassical to marker	
Shortcut	▲ Description
Ctrl+1	Script: ReaClassical_Move to Destination IN marker.lua
Ctrl+2	Script: ReaClassical_Move to Destination OUT marker.lua
Ctrl+3	Script: ReaClassical_Move to Source IN marker.lua
Ctrl+4	Script: ReaClassical_Move to Source OUT marker.lua
Alt+1	Script: ReaClassical_Zoom to Destination IN marker.lua
Alt+2	Script: ReaClassical_Zoom to Destination OUT marker.lua
Alt+3	Script: ReaClassical_Zoom to Source IN marker.lua
Alt+4	Script: ReaClassical_Zoom to Source OUT marker.lua

### **Basic Manual Install Inside Your Existing REAPER Install:**

1. Install both ReaPack (<https://reapack.com/>) and latest bleeding edge SWS Extensions (<https://www.sws-extension.org/download/pre-release/>) if you haven't already.
2. Import my repository into ReaPack by copying and pasting this link. If you need help with importing see <https://reapack.com/user-guide#import-repositories>.
3. Search for "ReaClassical" and install the main ReaClassical package and any jsfx plugins (my "RCPlugs" are highly recommended for classical work).
4. Use the ReaClassical project template for relevant projects (you can set this as default in the REAPER preferences) and change to the ReaClassical theme (Options > Themes).
5. Set up keyboard shortcuts in the actions list (? shortcut) as desired.
