Instructions for a new install:

1. Download the latest portable install as per the installation guide (it will create a new ReaClassical folder with a short year + quarter suffix e.g. "ReaClassical_23Q3"). Run the REAPER binary inside the folder!

Instructions to update ReaClassical:

1. Sync ReaPack to get the latest version of the ReaClassical scripts.
2. Download the latest portable install as noted above for a new install.
3. Copy across any updated files/settings to your previous install according to the notes below:

Updated config files to be copied to your existing resource path

(Options > Show REAPER resource path...):

- * reaclassical-splash.png (found in the root of the portable install folder)
- * In the Actions list (?), import the "ReaClassical" keymap from *KeyMaps*

Delete the downloaded new portable install and restart REAPER.
